Old world craftsmanship meets new world technology to make Plastpro Fiberglass Entry Doors the most advanced products available on the market today. Since 1994, Plastpro has been a market leader gained through the development of our exclusive Hydroshield Technology™. With the introduction of a full line PF™ Frames and Door Accessories, Plastpro is dedicated to provide the best products on the market today.

VERTICAL INTEGRATION

Since 1954, the world-renowned Formosa Plastics Group and one of its leading companies, Nan Ya Plastics Corporation, have offered customers top quality products at the greatest value. While other manufacturers outsource products and components, Plastpro can boast total vertical integration as part of the Formosa Plastics family companies, ensuring everything we do meets our rigorous standards. Our commitment to quality is backed by extensive research and technological developments that ensure consistent innovative products.

INNOVATIVE RESEARCH AND DEVELOPMENT

Vertical integration means that we can focus on improving each individual door component. By maintaining control over each stage of development, from raw materials to finished product, Plastpro has the power and flexibility to innovate every aspect of our manufacturing and products. Plastpro breakthrough products, offers the widest possible choice of product designs, colors, and sizes. Over the past 10 years, Plastpro has introduced Hydroshield Technology™, BTHP™ Snap-On Frames, and our versatile PF™ Frames line of composite doorframes.

ISO 9001 AND ISO 14000 DESIGNATION

Plastpro products have achieved world recognition through ISO 9001 and ISO 14000 designations for strict adherence to leading international quality standards.

TAKING ACTIVE STEPS TO PROTECT THE ENVIRONMENT

As part of our ongoing commitment to responsible environmental practices, we are proud to be Partners in the U.S. Government's Energy Star Program. As an Energy Star Partner, our products have been shown to meet regional standards for energy efficiency and conservation. Research shows that engineered lumber uses smaller pieces of fast-growing wood to obtain the same sizes as lumber from old-growth forests, but with more durability and strength. As a Built Green member, Plastpro products make a difference for the environment while being a cost effective alternative for our customers.

BACKED BY WARRANTY

We are proud to offer some of the best warranties in the industry. Plastpro Trimmable, Rustic, Mahogany, Woodgrain, Fir Grain doors, and PF Frames carry a Limited Lifetime Warranty; Smooth Skin and True White Oak doors, Onelite Flush Glazed doors carry a 25-Year Limited Warranty. Plastpro Doorlites carry a 10-year Limited Warranty. Pre-finished doors carry a 5-Year warranty on factory stained finish.

Plastpro's 200,000 square-foot, fully automated manufacturing facility in Ashtabula, Ohio is the most advanced in the door industry. Plastpro's innovative manufacturing methods include our fully integrated, computer-controlled system that enables greater product consistency and enhanced employee safety. As one of the most highly skilled and experienced manufacturing workforces in the nation with expertise in the molding and assembly technologies, we have up to 400 percent greater productivity than traditional manufacturing operations. By carefully controlling every phase of manufacturing, Plastpro can ensure the integrity and quality of every product.

plastpro

PATENTED HYDROSHIELD TECHNOLOGY™

Our exclusive water-resistant seal protects our doors against water infiltration on all six sides to prevent warping, delamination, corrosion, rotting, and the build up of mold and mildew. This Hydroshield seal consists of:

FIBERGLASS REINFORCED DOOR SKINS

Our high-impact compression molded skins will not splinter, dent, warp, rot or rust. Surfaces are easy to stain, paint and easy to clean.

FULL-LENGTH COMPOSITE STILES

Our full-length composite stiles provide complete waterproofing for the door's insulation and have twice the screw-holding power of traditional wood-edged doors. Our doors will never splinter like wood or delaminate like steel.

COMPOSITE TOP & BOTTOM RAILS

High strength composite top and bottom rails prevent moisture from seeping into the door. Bottom rails accommodate a range of door sweeps.

BTHP™ SNAP-ON DOORLITE FRAMES

Our exclusive BTHP™ Snap-on Frames employ a series of specially designed clips that lock decorative glass firmly in place. Our BTHP™ Frames have no unsightly plugs or screws, and create a cleaner, more natural appearance in any entryway.

EXTENDED LOCKBLOCK

Our extended lockblock allows a range of door locks and hardware to be installed into our doors.

ENVIRONMENTALLY SOUND POLYURETHANE FOAM CORE

While some other fiberglass door manufacturers still use HCFC-free foam, we are proud to offer a door that is completely CFC-free, in compliance with the United States environmental standards to prevent destruction to the Earth's ozone layer. The advanced polyurethane core enhances the door's soundproofing capabilities and provides insulation six times greater than wood doors.

FIRE RATED DOOR

PATENTED HYDROSHIELD TECHNOLOGY™

Our exclusive Hydroshield Technology™ features fiberglass reinforced door skins, full-length composite stiles, and composite top & bottom rails to prevent water infiltration on all six sides.

FULL LENGTH COMPOSITE TOP AND BOTTOM RAILS: Additional non-porous protection keeps water from seeping into the door and helps prevent the build up of mold or mildew.

FIBERGLASS REINFORCED SKIN: Fiberglass is unmarred by the wear and tear of everyday use and is unaffected by moisture and humidity. Our doors will not rot, splinter or warp like wood, and won't dent or delaminate like steel.

FULL LENGTH COMPOSITE STILES: All Plastpro fiberglass entry doors feature fully composite stiles to prevent water infiltration into the door's insulation and to ensure warp free, rot free and rust free doors.

TRIPLE PANE DECORATIVE GLASS: Our decorative doorlites provide excellent thermal protection while adding beauty and sophistication to your entryway.

BTHP™ DOORLITE FRAMES: Our exclusive frames create a completely unblemished surface around the decorative doorlite for an attractive appearance without unsightly screws or mismatched plugs.

WROUGHT IRON DOORLITE FRAMES: Specially engineered to complement the range of cutouts in the Rustic Series, each frame is beautifully hand made and has a durable powder coat finish. Available for all Wrought Iron doorlite collections.

ARCHITECTURALLY CORRECT PROPORTIONS: Plastpro doors are designed with beautifully detailed panels that are identical to traditional wood door construction to create crisper shadow lines and heightened curb appeal.

INSULATED CORE: Our environmentally friendly insulation is 100% CFC-free and provides a high R-value for maximum thermal protection.

plastpro doors have been put through a rigorous battery of tests, first in our own testing lab and again by an independent testing facility. Our results meet or exceed the Florida Building Standards. For more specific testing results, please see our website at www.plastproinc.com or visit the Florida Department of Community Affairs at www.floridabuilding.org.

PF™ FRAMES

PF™ Frames from Plastpro, Inc. are innovative new alternative to traditional wood door jambs. After extensive research and development, Plastpro formulated poly-fiber doorframe system that combines all the strength and convenience of wood but with enhanced properties to resist moisture, rot, and insect penetration. This unique formulation means that Plastpro's PF™ Frames will not absorb or wick moisture and remain warp free, splinter free and rot free. The advanced PF™ Frame system can be machined the same way as traditional wood jambs with no added hassles. Plastpro's PF™ Frames guarantee a long-lasting, rot-free entryway that will maintain its integrity today, tomorrow, as well as many years to come.

DOORLITE STYLES

We **KNOW** what makes a door unique. We offer a breadth of designs that will meet your requirements. Each piece of decorative glass is sealed between two pieces of tempered safety glass, providing excellent safety, sound, and thermal performance. The state-of-the-art Warm Edge spacer system provides a seal that protects and insulates your door & home for years to come. Unlike the competition, our metal coming includes a gasket that cushions & protects the glass from chipping, cracking, and rattling during door movement.

BTHP™ SNAP-ON DOORLITE FRAMES

Our exclusive BTHP™ Snap-on Frames employ a series of specially designed clips that lock decorative glass firmly in place. Our BTHP™ Frames have no unsightly plugs or screws, and create a cleaner, more natural appearance in any entryway. Able to withstand temperatures over 200 degrees Fahrenheit, this frame is perfect for use in any door.

*For FL5 (20 x 64), HL3 (20 x 36) & TL5 (20 x 8-1/4) glass, the units come w/ screw frame only

WROUGHT IRON DOORLITE FRAMES

This maintenance-free Wrought Iron doorlite frame resists rust and corrosion while working to keep cold out in the winter and heat out in the summer. Specially engineered to complement the range of cutouts in the Rustic Series, each frame is beautifully hand made and has a durable powder coat finish. May also be used in select Smooth Skin, Woodgrain, and True White Oak doors.

WOODGRAIN & SMOOTH SKIN

Our WOODGRAIN doors have a rich oak grain pattern that resembles the look, feel and texture of real wood without any of the problems associated with wood. Maintain the original look and feel of your home, but with all of the benefits of fiberglass. Made with our exclusive Hydroshield Technology™ our doors will never rot, warp or crack like wood.

Plastpro SMOOTH SKIN doors are a long lasting alternative to steel doors that provide all the benefits of fiberglass. Made with our exclusive Hydroshield Technology™ our doors will never dent, rust, or delaminate like steel. Made with a pre-pigmented white skin, our doors resist the appearance of scratches.

PRISCILLA

WROUGHT IRON

This antique style wrought iron design is set in between tiny bubble-tempered glass that brings a classic charm to every entry door while applying a high degree of privacy.

TRUE WHITE OAK

The True White Oak Series combines the best features of our smooth skin and oak grain doors—a traditional oak grain pattern and pre-pigmented white skin that resists scratches and yellowing for years to come. True White Oak combines the elegance of oak graining with a UV-protected white skin for stylish versatility.

ONELITE

Our Flush Glazed doors create the cleanest profiles available. Onelite doors allow for an abundance of natural daylight and generous views, while maintaining maximum energy efficiency. Doors feature a removable stop that allows the glass to be easily replaced at any time and are available with a clear double-insulated tempered glass, LoE², GBG, or Miniblinds.

ONELITE | FLUSH GLAZED

ONELITE FLUSH GLAZED DOOR

DOUBLE-PANED GLASS is available in Clear IG, GBG, and LoE² options

FIBERGLASS SKIN is unmarred by the wear and tear of everyday use, and is unaffected by moisture and humidity. Our doors will not rot, splinter or warp like wood, and won't dent or delaminate like steel

EXCHANGEABLE GLASS STOP allows for easy replacement of the glass

100% CFC-FREE POLYURETHANE CORE is environmentally friendly and provides a high R-value for maximum thermal protection.

FULL COMPOSITE STILES AND RAILS protect the door from water infiltration on all six sides to ensure our door will never warp, rot, or rust.

FIRE RATED

Made with fire retardant foam and guarantee to withstand fire for a minimum of 20 minutes. Plastpro fire-rated and waterproof fiberglass doors qualify homeowners for energy savings that result in the reduction of your overall energy bill. We are the 1st and only fiberglass door manufacture that provides not only fire rated doors, but water proof entry systems as well. Our fire-rated doors are extremely durable and fire-resistant, and most importantly provide a safe home that's affordable and energy efficient.

FIRE RATED SERIES | 20 MIN 6/8 TALL

IMPACT

Plastpro Impact Doors are engineered to withstand penetration of flying objects while maintaining all of the benefits and beauty of our panel doors. Our innovative R&D department has pioneered a unique patent-pending process whereby a missile-proof shield is built-in to reinforce the door. Impact doors are available in Woodgrain, Smooth Skin and Flushed Glazed with specially formulated Impact-Resistant glass.

ACCESSORIES

Plastpro has developed a new line of decorative door accessories to complement our unique product offerings. Our accessories have been designed with a scientifically formulated adhesive for use with Plastpro Fiberglass Doors. All accessories applied by Plastpro distributor/ dealer.

SDL BARS

Plastpro SDL Bars, also known as Simulated Divided Lights, are an energy efficient alternative to true divided lights to prevent unwanted heat or cold to enter your home. They can be used on the interior and exterior of your doorlite to create personalized look or to replicate classic designs. Plastpro SDL Bars add the rich three-dimensional effect of traditional wood products, without the risk of warping, cracking or rotting.

- ENERGY EFFICIENT
- RECREATE CLASSIC DESIGNS
- CREATE CUSTOM LOOKS
- AFFORDABLE

SDL external bars sold separately and applied by Plastpro distributor/ dealer

DENTIL SHELVES

Plastpro Dentil Shelves are made of lightweight HDP and will not warp, rot or crack. High Density Polyurethane (HDP) is an excellent alternative to GFRG, GFRC, FRP, and traditional wood products. Available in Woodgrain, Smooth Skin and Fir Grain finish.

*Dentil Shelves applied by Plastpro distributor/ dealer.

THE HIGH DENSITY POLYURETHANE (HDP) PROVIDES MANY BENEFITS SUCH AS:

EASY INSTALLATION using common wood working tools and equipment

WILL NOT ROT or absorb moisture, and resists the growth of fungus and mildew

CLOSED CELLULAR STRUCTURE prevents paint from peeling from the surface

WILL NOT WARP OR CRACK when properly installed, or be affected by UV rays when properly coated

CLAVOS

Plastpro decorative Clavos provide the perfect accent to some of the most beautiful and highest quality fiberglass doors in the industry. In addition to providing a distinct and unique element to any distressed fiberglass door, our decorative Clavos enhance our fiberglass entry doors, and provide the perfect “finishing touch” to virtually every Rustic door we provide.

EASY TO APPLY

SCIENTIFICALLY FORMULATED ADHESIVE unique for fiberglass doors

MASTERFULLY HANDCRAFTED of premium metal alloy

TOUGH & DURABLE powder coat finish

*Clavos applied by Plastpro distributor/ dealer.

Plastpro Clavos provide the perfect finishing touch to virtually every Rustic door we provide.

STAINING GUIDE: WOODGRAIN

MATERIALS NEEDED - PLASTPRO PRE-FINISH KIT OR:

- | | |
|---------------------------------|---------------------------|
| A. Pre-Mixed Stain (1/2 pint) | F. 3" China Bristle Brush |
| B. Mineral Spirits (4 fl. oz.) | G. Two Stir Sticks |
| C. Top Coat/Sealer (20 fl. oz.) | H. Two Skin Samples |
| D. Two Clean Cloth | I. Finishing Instruction |
| E. One Pair Protective Gloves | |

STEP 1: SURFACE PREPARATION

1. Lay door horizontally on saw horses or a table.
2. Remove all the hardware and mask off anything you don't want stained such as the glass insert.
3. DO NOT SAND GRAINED FIBERGLASS
4. Wipe the door with mineral spirits to clean any dust or residue from the surface. Allow door surface to dry completely before applying stain.

STEP 2: STAIN APPLICATION

FIRST COAT

1. Starting at the center of the door, stain one to two panels at a time. Apply stain with a 3" to 4" soft bristle brush, or rag. Apply enough stain to fill the door grain. (Refer to the door staining diagram.)
2. With a clean, lint-free 24 x 24 inch cloth, softly wipe the surface until you reach your desired tone.
TIP: When the rag becomes saturated with stain, re-fold to work with a less-saturated section. Be sure to use the same rag for the whole door.
3. After all the stain is brushed evenly you may add finishing touches by using a small 1" to 2" brush or cotton swabs.

SECOND COAT (if desired)

ALLOW THE DOOR TO DRY FOR AT LEAST 48 HRS. BETWEEN COATS.
Repeat as above.

STEP 3: PROTECTIVE TOP COAT

Application of polyurethane top coat with UV inhibitors like ZAR™ Exterior polyurethane, Wood Kote® Flagship UV, or Minwax® Fast Drying Polyurethane for exterior applications

1. After stain has completely dried (48 hours), mix the top coat well and apply evenly using a clean dry 2" soft bristle brush or 3" foam brush. Be sure to stop when the grain changes direction.
2. Apply two or three coats of finish, allowing at least 24 hours of drying time between each application.

NORMAL MAINTENANCE

Even a well-finished fiberglass door will be affected by exposure and weathering from sun, moisture, and air pollutants. It is considered normal maintenance to re-apply the topcoat approximately every two years.

*Staining instructions are for Oil-Based, Premium Quality Wood Stains or similar product designed for use on a fiberglass surface. Please note the instructions indicated are specific to the Zar brand stain included in our stain kit. Please reference stain manufacturers instructions before applying any stain.

PAINTING GUIDE: WOODGRAIN

MATERIALS NEEDED

- | | |
|--------------------|--|
| A. Lint-free cloth | E. 4" Bristle Brush |
| B. Mineral Spirits | F. For Water-based Application: Acrylic-based primer*/ acrylic latex-based exterior grade paint. |
| C. Rubber gloves | |
| D. Masking tape | |

*We recommend using 'Sherwin-Williams PrepRite® Bonding Primer' with compatible acrylic-latex paint for optimal paint adhesion.

STEP 1: SURFACE PREPARATION

1. Lay door horizontally on saw horses or a table.
2. Remove all the hardware and mask off anything you don't want painted, such as the glass insert.
3. DO NOT SAND GRAINED FIBERGLASS.
4. Wipe the door with mineral spirits to clean any dust or residue from the surface. Allow door surface to dry completely before applying stain paint. Do not use hydro-carbon based solvents to clean the surface as such products may leave a residue.
5. Apply primer with a 4" brush beginning with the panels. Follow the manufacturer's instructions for drying time before applying topcoat. Continue to apply the primer to ALL 6 sides. Doors which have been bored and morticed for hardware should be primed inside of the lock bore as well.
6. The primer must be completely dry before applying the topcoat.

STEP 2: PAINTING

1. Apply exterior grade paint with 4" brush beginning with the panels.
2. It is common practice to paint both stiles the same color as the exterior side of the door. If applying a second coat, follow the manufacturer's instructions for drying time between coats.
3. Continue to apply the top coat to ALL 6 sides. door which have been bored and morticed for hardware should be finished inside of the lock bore as well.

CAUTION

1. When using stains, mineral spirits, paints, or other hazardous materials, always read and follow the manufacturer's instructions. Plastpro, Inc. makes no representations as to the proper use of other manufacturers' products.
2. When working with paints or solvents, make sure the working area is well ventilated.
3. Keep away from heat and flame as materials may be combustible.
4. Paints or solvents may cause skin and eye irritation. Avoid contact with skin and eyes.
5. Keep out of reach of children.

NORMAL MAINTENANCE

Even a well finished fiberglass door will be affected by exposure and weathering from sun, moisture, and air pollutants. It is considered normal maintenance to re-apply the topcoat approximately every two years.

PAINTING GUIDE: SMOOTH SKIN

MATERIALS NEEDED

- | | |
|--------------------|--|
| A. Lint-free Cloth | E. 4" Bristle Brush |
| B. Mineral Spirits | F. Scotch Brite Pad (Fine) or 320-400 grit sandpaper |
| C. Rubber Gloves | |
| D. Masking Tape | G. For Water-based Application: Acrylic-based primer*/ acrylic latex-based exterior grade paint. |

*We recommend using 'Sherwin-Williams PrepRite® Bonding Primer' with compatible acrylic-latex paint for optimal paint adhesion.

STEP 1: SURFACE PREPARATION

1. Lay door horizontally on saw horses or a table.
2. Remove all the hardware and mask off anything you don't want painted, such as the glass insert.
3. Lightly scuff sand the surface with a Scotch Brite pad or fine sand paper.
4. Wipe the door with mineral spirits to clean any dust or residue from the surface. Allow acetone to dry from the surface before applying
5. Do not use hydro-carbon based solvents to clean the surface as such products may leave a residue.
6. Apply primer with a 4" brush beginning with the panels. Follow the manufacturer's instructions for drying time before applying topcoat. Continue to apply the primer to ALL 6 sides. Doors which have been bored and morticed for hardware should be primed inside of the lock bore as well.
7. The primer must be completely dry before applying the topcoat.

STEP 2: PAINTING

1. Apply exterior grade paint with 4" brush beginning with the panels.
2. It is common practice to paint both stiles the same color as the exterior side of the door. If applying a second coat, follow the manufacturer's instructions for drying time between coats.
3. Continue to apply the top coat to ALL 6 sides. door which have been bored and morticed for hardware should be finished inside of the lock bore as well.

CAUTION

1. When using stains, mineral spirits, paints, or other hazardous materials, always read and follow the manufacturer's instructions. Plastpro, Inc. makes no representations as to the proper use of other manufacturers' products.
2. When working with paints or solvents, make sure the working area is well ventilated.
3. Keep away from heat and flame as materials may be combustible.
4. Paints or solvents may cause skin and eye irritation. Avoid contact with skin and eyes.
5. Keep out of reach of children.

NORMAL MAINTENANCE

 Door staining instructions

- Increase protection and durability to your plastpro fiberglass entry door
- Faster drying time with environmental friendly water based top coat
- Special formula with long lasting vibrant colors
- Easy do-it-yourself use
- Designed exclusively for plastpro fiberglass entry doors

NORMAL MAINTENANCE Even a well finished fiberglass door will be affected by exposure and weathering from sun, moisture, and air pollutants.

It is considered normal maintenance to re-apply the topcoat approximately every two years.
